### Graduate School Recommendation

December xx, 20xx

To the Review Committee:

I am pleased to write a letter of recommendation for Janet Lerner, an honors undergraduate student in our program. I have known Janet for more than two years. I came to know her very well when she was a student in my economic geography course. This summer, I hired her to work on an NSF-sponsored research project on Human Dimensions of Global Environmental Change. And for the past six months, we have been developing a laboratory manual for my undergraduate course on the global economy. It is on the basis of this extensive experience that I write a letter of unequivocal support.

Janet is an undergraduate student in the honors program at Mythic University. The honors program is designed to provide the educational experience of a small Ivy League college within a large public university. To be accepted, a student must have high SAT scores, be an excellent writer, and have very good high school grades. Students fulfill their course requirements by taking honors courses or by selecting a combination of classes with a heavy emphasis on graduate seminars and independent reading courses. Students must maintain a GPA of 3.2 or better in all courses in order to remain in the honors program. Janet has fulfilled this requirement admirably, maintaining a GPA of 3.8 or better throughout her career. Over the last few years, Janet designed a difficult curriculum for herself and has been very successful in combining graduate seminars and advanced undergraduate reading courses to fulfill her degree requirements. She is comfortable with herself and is well-recognized by her peer group. She, along with her peers from the honors program, will enter the nation's best graduate schools next year in such varied fields as medicine, law, and other allied social sciences. She seeks to enroll in your graduate planning program.

Janet is an enthusiastic, energetic, and exceptionally well-organized student. She writes beautifully, is widely read, and demonstrates good quantitative skills. In my economic geography course, she was the best student in the class. Her performance exceeded that of the incoming graduate students, including an NSF fellowship recipient. She always came to class prepared and was clearly far above her peers in understanding and appreciating the course material.
